A GUIDE TO MYSTUF AND THE MYSTUF FAMILY OF APPS

Meet myStuf

What it keeps track of, how everything links together, and which app fits you: myStuf, the lite apps, or yourStuf for your business.

INSIDE: MYSTUF, EIGHT LITE APPS AND YOURSTUF

The app that remembers the things you don't want to have to remember.

Your home and everything in it, your cars, your family's health records, your contractors, recipes, books, passwords and sizes. myStuf keeps them in one app on your phone and on the web, and connects them so you enter each thing once.

33

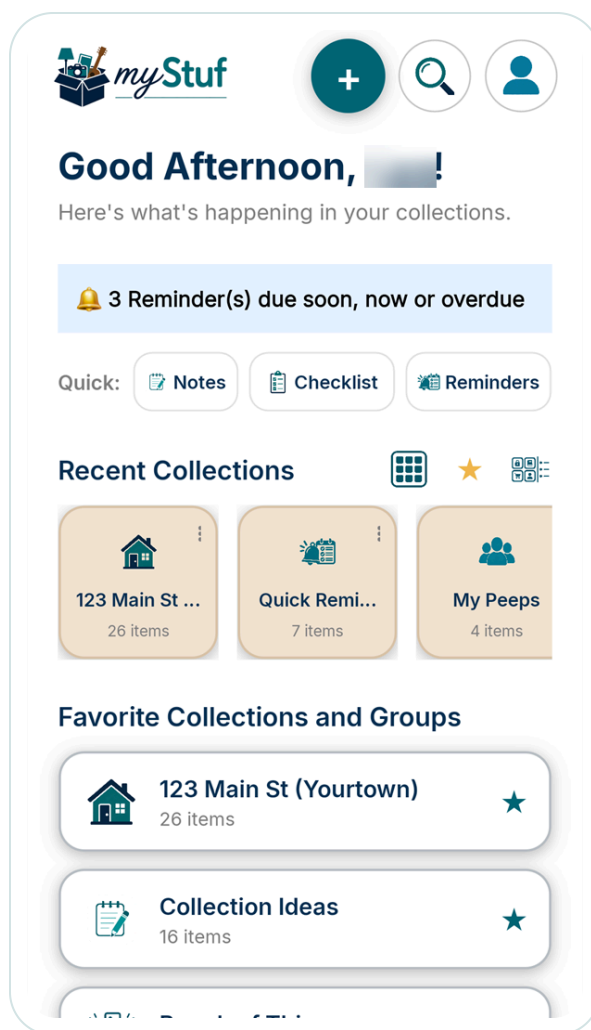

ready-made collection types, with more added regularly

1x

enter a person, doctor or company once and link it everywhere

Phone + web

the same data in the app and at myStuf Online

Collections hold your stuff. Everything else helps you find it.

You don't design a database. Pick a collection type and myStuf already knows the fields that thing needs. A vehicle gets a VIN, mileage and insurance. A medication gets a dose and schedule. Add your own fields when a template is missing one.

The built-in library, by area of life

Collection types available on day one. Hover a bar to see which types are included.

- **Collections** are where things live: one per home, a recipe box, the family's medications.
- **Groups** bundle related collections, such as "Homes and Cars", so they open together.
- **Favorites** pin any collection or group to the top of Home.
- **Search** reaches everything you've ever entered, from one icon.
- **Quick Notes, Quick Checklist and Quick Reminders** are always one tap away on Home, and never count against your plan.
- **Custom fields and custom types** cover anything the library doesn't.

AREA	COLLECTION TYPES
Personal	People, Memories, Photo Gallery, Chores, Important Documents, Prayer Requests, Bible Reading Plans
Medical	Physicians, Medical Records, Medications, Glucose Readings, Care Locations
Productivity	Notes, snapStuf, Checklist, Reminders
Property	Home Inventory, Books/Periodicals, Vehicle, Tools
Business	Service Providers, Restaurants
Entertainment	Movies, Music
Food	Grocery List, Recipes
Education	School
Financial	Receipt, Budget
Pets	Pets
Security	Account/Password
Other	Sizes
Uncategorized	Mixed Collection

Point your camera at it. myStuf fills in the form.

Typing is the reason most people give up on keeping records. myStuf reads what's in front of you, looks up the rest, and leaves you to check it and tap Save.

1

Snap it
Point the camera at a label, card, receipt or barcode.

2

myStuf reads it
The text is read from the photo and matched to the right fields.

3

It looks up the rest
Trusted public sources fill in what the photo can't show.

4

You check and save
Nothing is saved until you've seen it.

Other ways in

- **Rapid Add** walks you through one field at a time, built for adding a whole room or shelf in a row.
- **Your layout:** reorder any field, or pair two on one row, and every form for that type follows.
- **Spreadsheet import** brings an existing list in all at once.

What the camera reads

**Receipts**
Store, price and date

**Medication bottles**
Name, dose and how often
[OpenFDA](#)

**Insurance cards**
Insurer, policy and member numbers

**Vehicle VINs**
Year, make, model and open recalls
[NHTSA](#)

**Book covers and ISBNs**
Title, author and publisher
[Google Books](#) · [OpenLibrary](#)

**Business cards**
Names, phone numbers and emails

**Edit Book**
Add a book to your library. 5 of 17

Recalls & Resources

 [Check for Recalls](#)

 [Find Owner's Manual](#)

 [Find Parts](#)

Recalls check NHTSA.gov directly. Manual/Parts open a web search using this vehicle's Make/Model/Year.

A vehicle record. Check for recalls, find the owner's manual or parts, and set a registration reminder from the same screen.

Write it once. Link it everywhere.

In most apps a doctor's name gets typed into every visit, every prescription and every family member's file. When the phone number changes, half of those copies stay wrong. In myStuf the doctor is one record, and everything else points at it.

1

Enter it once
Add Dr. Priya Shah to Physicians with her specialty, phone and practice.

2

Link it anywhere
Pick her from a list on a visit, a care team or a prescription. No retyping.

3

Find it from both sides
Links go both ways. Open the doctor and see what points at her.

4

Change it once
Update her phone number and every place that shows it is right.

Treatment (Optional)

What treatment was given?

Physician

Dr. Priya Shah

➔ ✕

Location

Northside Family Clinic

➔ ✕

On a visit. Physician and location are linked records. The arrow opens either one.

Gas

Constellation

➔ 🔗

Water

➔ 🔗

Internet

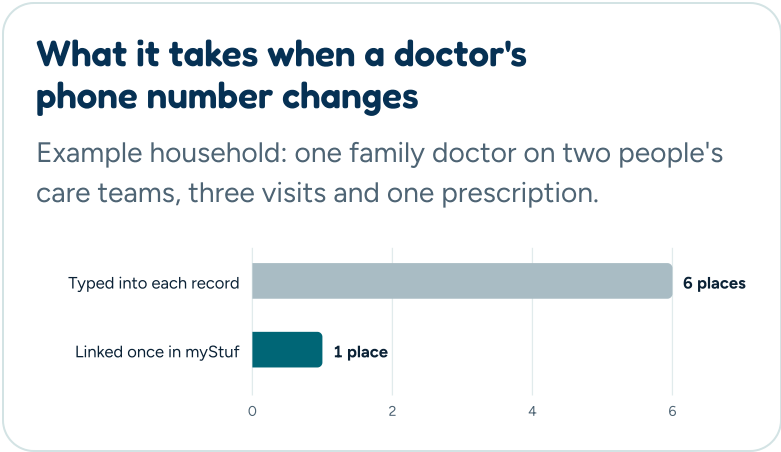

ATT

➔ 🔗

Phone

➔ 🔗

On a home. Every utility can be a linked company record. The arrow opens it, phone number and all.

Insurance too. The Insurance Provider on a home, a vehicle and a medical record all link to the same Service Providers list. One company record, one phone number to fix when it changes.

One entry per person. Their page fills itself in.

A person isn't only in your People list. They take a medication, drive a car, own a dog, borrowed a book and have a shoe size. Each of those is a field that points at the person, so their own page gathers all of it into tabs: what's linked to them, their dates, sizes, gift ideas, family, what they've borrowed and an emergency card.

Fields that point at a person

- **Sizes:** For
- **Home Inventory:** Belongs To
- **Books and Movies:** Loaned To
- **Medical Records:** Linked Contact
- **Medications:** Taken By
- **Pets:** Owner
- **Receipts:** Bought For
- **Tools:** Checked out to
- **Vehicles:** Primary Driver
- **Other people:** Relationships such as spouse, parent and child, shown from both sides

One person's medical record. Care team, medications and visits are all linked records, so each dose and doctor is kept in one place.

IN THIS COLLECTION	THIS FIELD	POINTS AT	SO YOU GET
Home Inventory	Belongs To	People	Whose it is, and the item appears on their page
Home Inventory	Insurance, Electric, Gas, Water, Internet, Phone, Trash, Sewer/Septic	Service Providers	Every utility and insurer for the property, each with a phone number
Home Inventory	HVAC Filter Size	Sizes	The filter size you already recorded
Vehicle	Primary Driver, Insurance Provider	People, Service Providers	Who drives it and who insures it
Medical Records	Linked Contact, Insurance Provider	People, Service Providers	The person the record is for, and their insurer
Medical Records	Care Team, Medications, Visits	Physicians, Medications, Care Locations	A whole health picture built from records you already keep
Physicians	Location	Care Locations	The practice or hospital, with its address and map pin
Pets	Medications	Medications	The pet's dose and schedule kept in one place
Any item	+ Link Item	Any item, collection or group	Your own connections, like a truck to its inspection reminder

Page 7 of 21

Your home, connected.

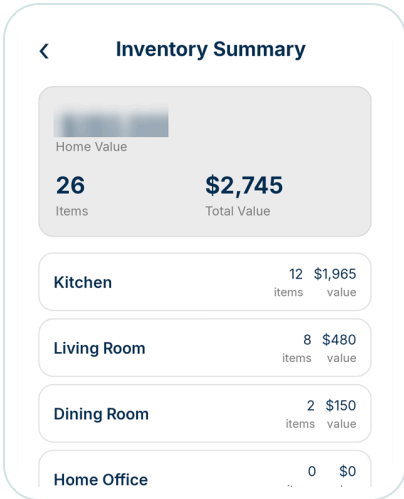

A home is more than a list of things. Rooms hold items, items have owners, the furnace has a service history, and the utilities each have a company and a phone number. Home Inventory keeps all of it in one place and links out to the people, companies and sizes you already track.

Items by room. Home systems sit at the top, then each room with its items and values.

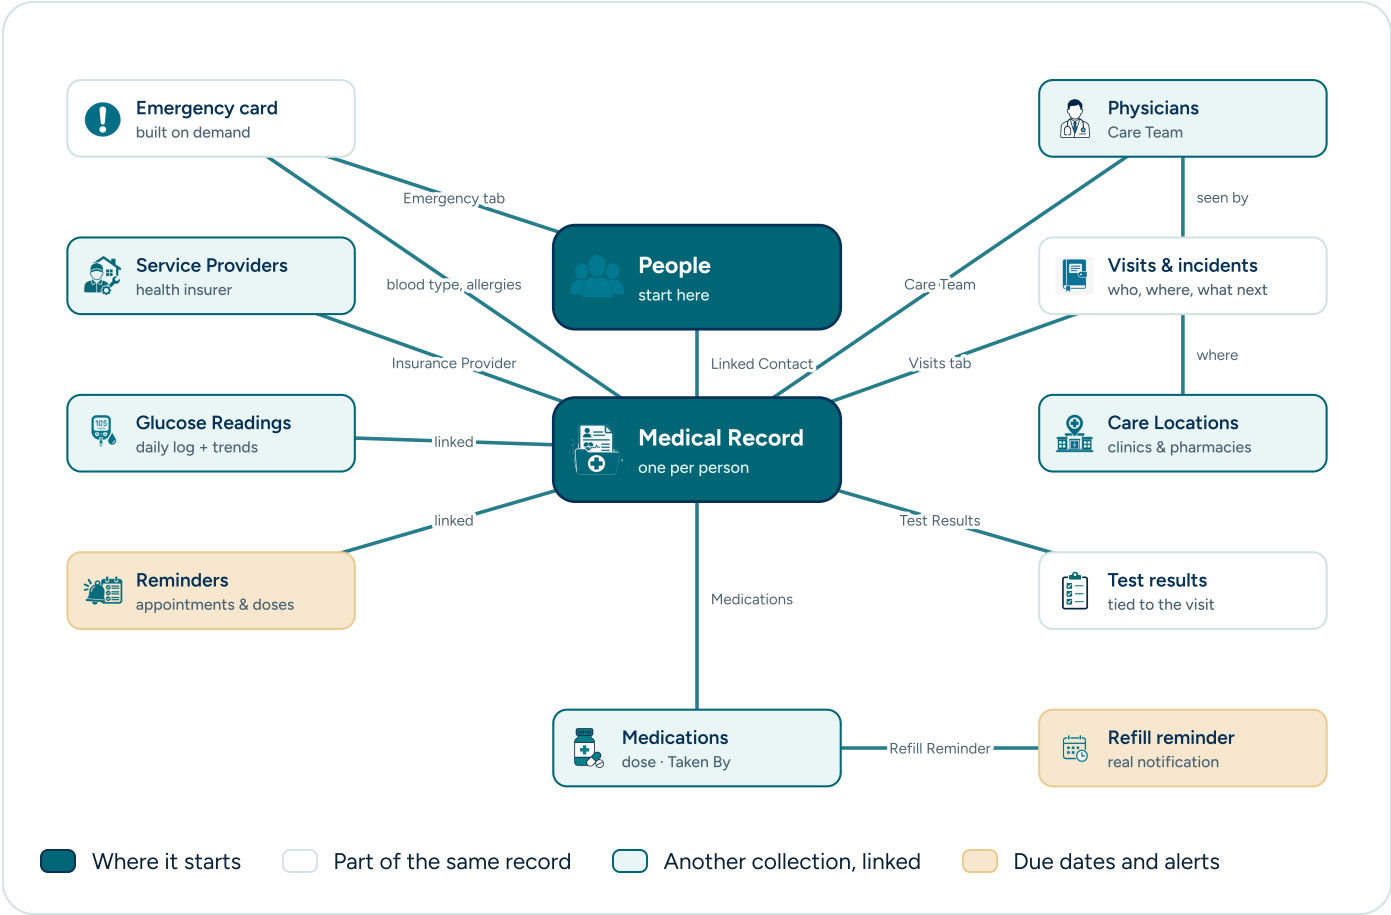

Maintenance. Each job is tied to the system it's for, with its next due date.

Inventory summary. Item counts and values by room, ready for an insurance claim.

Your family's health, connected.

Who's allergic to what. Which specialist is at which clinic. What the last visit decided, and when the next refill runs out. A medical record for each person ties the whole care picture together, built from doctors, places and medications you enter once.

Treatment (Optional)

What treatment was given?

Physician

Location

Visits. The physician and location are links to records you already keep, not retyped names.

Last Refilled

Refill Reminder (Optional)
Add date and time

Taken By

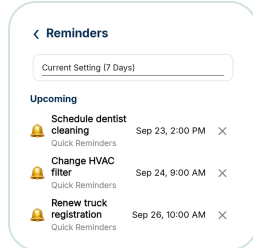

Drug Information

Refills. A refill reminder, a Taken By link to the person, and an FDA drug-info lookup.

Built for the moments you actually need the information.

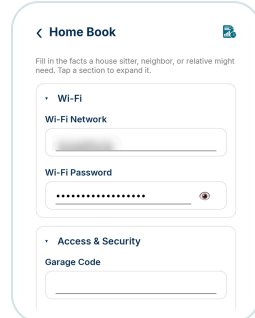

Reminders that actually notify

Put a due date on anything, like a warranty, a refill or a filter change, and myStuf sends a real push notification to your phone. Home shows what's due soon, now or overdue.

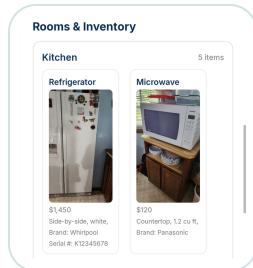

The Home Book

Everything a house-sitter, neighbor or relative needs: Wi-Fi, garage and alarm codes, water shutoff, trash day, contractors and emergency contacts. Codes stay hidden until you tap to show them.

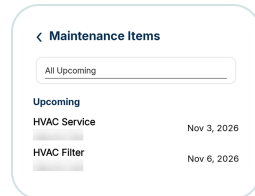

Reports you can hand to someone

Print or share a whole collection or a single item: a home inventory room by room for your insurer, a medication list for a new doctor, a vehicle's service history for a buyer.

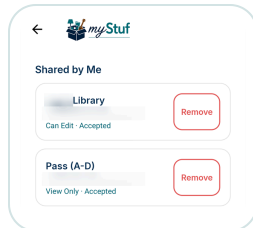

Maintenance that doesn't sneak up

Homes and vehicles keep a maintenance log with intervals. myStuf works out when each job is next due and lists everything coming up in one place, from the HVAC filter to the oil change.

Share a collection with the people who need it

Invite someone into one collection with View or Edit permission: a shared home inventory with a partner, a family recipe box, a vehicle log everyone adds to. It shows up in their own app and stays in sync. Either side can leave at any time.

Your data stays yours

- Cloud backup and sync on every plan, including the free trial.
- myStuf Online: the same collections in your web browser.
- Backup and Restore in one tap, verified end to end.
- Export and import as spreadsheets, so you're never locked in.
- Photos, files and voice recordings attached to any item.

ASK, THE AI ASSISTANT

Ask about your stuff in plain English.

You've written it all down. Ask finds it for you. Type or say a question the way you'd ask a family member, and Ask looks through what you keep in myStuf, including collections other people share with you. It answers from your own records, not from a web search, and it can add things for you too.

Ask about your stuff

When was my last oil change on the Colorado?

August 12 at Valvoline: 52,300 miles, \$79. At your usual 5,000-mile interval, the next one is due around 57,300.

What meds is Mom on?

Mom has 3 active medications: Lisinopril 10 mg once a day, Atorvastatin 20 mg at bedtime, and Vitamin D 1,000 IU once a day. Dr. Priya Shah prescribed the Lisinopril.

Remind me at 4pm to take the turkey out

Quick Reminders

Add

Edit...

Cancel

Ask about your stuff...

Example conversation. Answers come from the records in your own account.

Ask anything you've recorded

- "When does the truck registration expire?"
- "Who's our plumber, and when did they last come out?"
- "What's my 10-day glucose average?"
- "What size air filter does the house take?"

Add by voice or text

"Log an oil change on the Colorado today at 52,300 miles."
Ask fills in a card with the details. Nothing is saved until you tap Add, or Edit it first.

Starts where you are

Open Ask from a vehicle or a person's medical record and it already knows which one you mean. Print any answer to hand to a mechanic or a doctor.

Private by design

Ask never sees passwords, PINs, door or alarm codes, or account and card numbers.

Not used for training

What Ask looks up is sent to Claude, Anthropic's AI, only to answer you.

Short memory

Chats are deleted 7 days after your last message.

Phone and web

In every plan: 30 prompts a month on Standard, 50 on Premium and 100 on Ultimate.

SECURITY & PRIVACY

Your stuff, locked up tight

Medical records, important documents, the people you love: what you keep in myStuf is personal. So it's encrypted everywhere it lives, and only you decide who else sees it.

On your phone

The app's whole database, every photo, document and voice recording is encrypted (AES-256). The key is made on the phone, kept in its secure key store, and never leaves it. A lost phone or a copied file shows only scrambled data.

On our servers

Every field you fill in, descriptions, notes, medical history and Ask chats are encrypted at rest, field by field. The key is kept apart from the database, so a copy of the database on its own can't be read.

In backups

Nightly backups are encrypted with their own separate key before they leave the server, and restoring them is tested. Backups you make yourself can be protected with your own password.

On the way

Every connection between the app, myStuf Online and our servers uses HTTPS, and browsers are told never to use anything less.

You decide who sees what

- **Lock it.** Open myStuf with your fingerprint, face or phone PIN, lock sensitive collections like Important Documents, and hide myStuf in the app switcher.
- **Share by invitation only.** Pick the person and whether they can view or edit, and take it back any time.
- **Choose what Ask sees.** Ask is off until you turn it on, never sees passwords, PINs or ID and account numbers, and you can leave out Medical Records, Medications, Glucose Readings or Important Documents.
- **Delete it all.** Delete your account, and everything in it, yourself in the app or on the web.

What we don't do

- Sell your data or show you ads.
- Look through your collections.
- Train AI on what you keep in myStuf.

Details: mystuf.app/security and mystuf.app/privacy.

PLANS

Try it free for 21 days. Then pick the room you need.

Every plan is the same app with every feature, so moving up or down never means starting over. Start with a free 21-day trial of Standard, no card needed, then choose a plan in the app. The bigger plans add storage, Ask prompts, devices, collections and sharing.

	Standard \$4.99/mo or \$49.99/yr	Premium \$9.99/mo or \$99/yr	Ultimate \$14.99/mo or \$149/yr

Custom collection types and form layouts	✓	✓	✓
Reports, push notifications, myStuf Online on the web	✓	✓	✓
Cloud backup, sync, spreadsheet import and export	✓	✓	✓

Plans are bought in the myStuf app through Google Play. Move to a smaller plan and nothing you've saved is deleted. Current plans and prices are at mystuf.app/pricing. Businesses can get a branded version, yourStuf, quoted to their needs.

Only need one thing? There's a lite app for that.

Each lite app does one job, and comes with the few companion lists that job depends on. They use the same myStuf account, so when you're ready for more, open myStuf and everything is already there.

Track it. Organize it.
Own it.

Everything about your home, room by room.

Keep every property you own or rent in one place: what's in each room, what it's worth, who to call when something breaks, and what a house-sitter needs to know.

COLLECTION TYPE [Home Inventory](#)

ALSO COMES WITH [Service Providers](#)

Keep your plumber, electrician, insurance agent and every utility company in one list, then link them right from the home. Tap a utility or a maintenance entry to call the company that handles it.

Inside the app

- Rooms with their own contents, photos and values
- Rapid Add Rooms sets up a whole house in minutes
- Maintenance log with a Maintenance Due list
- Home systems summary and full inventory summary

The Home Book

- Wi-Fi, alarm and garage codes in one place
- Water shutoff, breaker box and trash day
- Plumber, electrician, neighbor and emergency contacts
- A printable Home Book and insurance inventory

Also on file: square footage, year built, HOA contact, mortgage and insurance details, every utility provider, and the HVAC filter size you always forget at the store.

Track it. Organize it.
Own it.

Your garage, in your pocket.

Every vehicle in the household with its specs, paperwork, service history and running costs, ready when the mechanic, the insurer or the DMV asks.

COLLECTION TYPE **Vehicle**

ALSO COMES WITH **Service Providers**

Your mechanic, tire shop, body shop and insurance agent, linked to each car and each service entry, so you always know who did the work and how to reach them.

Inside the app

- Maintenance log for oil changes, tires and repairs
- Expense log for fuel, parts and fees
- Maintenance Due list and reminders
- A printable vehicle report

Details it keeps

- VIN, license plate, trim, engine and drivetrain
- Mileage, condition and primary driver
- Insurance provider, policy number and contact
- Registration expiration date

At the parts counter: tire size, wiper blade size and battery type are saved with the car, so you can stop guessing.

Measure it. Save it.
Find it.

Every size you need, when you're standing in the store.

Clothing sizes for everyone in the family, the filters your house takes, the measurements of every room. Pick a template, fill it in once, and look it up in seconds.

COLLECTION TYPE **Sizes**

People

Shirt, pants, ring, shoes, full body measurements

Home

Air filter, water filter, rooms and spaces, windows

Vehicle

Tire size, wiper blades

Make your own: add a template for anything else you measure. Tire sizes are stored in parts (width, aspect ratio, rim) so 225/65R17 reads exactly the way it's printed on the sidewall.

Snap it. Caption it.
Done.

Snap a photo, speak a caption, move to the next shot.

A fast photo log for when you need a record, not a camera roll. Walk a job site, a rental before move-in, or a storage unit, and leave with every photo labeled.

COLLECTION TYPE **SnapStuf**

Inside the app

- Sites keep each shoot separate
- Rapid Add takes photo after photo with no extra taps
- Captions by voice, so your hands stay free

Afterwards

- Search every caption across every site
- Per-site settings for how you capture
- Reminders to go back and follow up

Track it. Manage it.
Never forget it.

Your family's health history, ready for the next appointment.

One record per family member, plus the doctors and places that care for them. No more trying to remember the date of a surgery or the name of a medication at the front desk.

COLLECTION TYPE

Medical Records

ALSO COMES WITH

Physicians

Care Locations

Medications

People

Doctors, hospitals and pharmacies each get their own list. Medications are kept once and added to each family member who takes them, with dose and schedule. Every record links to the person in your contacts.

Each person's record

- Medications, allergies and conditions
- Test results, incidents and surgeries
- Family history and care team
- Blood type, insurance and emergency contact

Doctors and places

- Physicians by specialty, with phone and website
- Hospitals, urgent care, dentists, labs and pharmacies
- Addresses with map pins for directions
- A printable medical summary to hand over

Track it. Loan it. Get it
back.

Know what you own, and who borrowed it.

A toolbox inventory for the garage, the shop or the crew. Record each tool once, check it out to whoever borrows it, and see its history when it comes back.

COLLECTION TYPE

Tools

ALSO COMES WITH

People

Check a tool out to someone from your contacts, or add a new borrower on the spot.

Loans

- Check a tool out to a person
- Loan history for every tool
- Track individual units of tools you own more than one of

Inventory

- Brand, model and serial number for warranty and theft claims
- Warranty expiration, purchase price and storage location
- Rapid Add, spreadsheet import and printable lists

Consumables too: note the blades, bits and batteries each tool takes, so restocking is a quick look instead of a trip back to the garage.

COMING SOON

A family chore chart that kids actually want to check off.

Add the kids, or anyone in the house, and the chores each one is responsible for. Chores repeat daily, weekly or monthly and carry over on their own. Every check mark earns stars that kids spend in a reward shop you fill, or save toward a goal.

COLLECTION TYPE Chores

The chart

- Daily, weekly and monthly chores
- Chores done more than once a period, like brushing teeth twice a day
- Chores that wait for a parent's OK, plus optional bonus chores

Motivation

- Stars for every finished chore
- Streaks, levels and a Perfect Day bonus
- A reward shop and savings goals for each kid

COMING SOON

Know where the money went, and whether you're on plan.

Enter an expense in a few seconds: the amount, a tap on where you spent it, and save. The category and how you paid fill themselves in from last time. Give each category a monthly plan and see what's left, track the bills and paychecks that come on a schedule, and compare this year with last.

COLLECTION TYPE Budget

Every month

- Quick Add with a keypad and your usual places
- A plan per category, with sub-categories like Utilities > Electric
- Bills and paychecks, with reminders and a Paid button

The bigger picture

- Every month of the year side by side
- This year against last, by month and by category
- Shared with your spouse, with who added what

The lineup at a glance

APP	COLLECTION TYPES (main + companions)	BEST FOR	STANDOUT FEATURE
homeStuf	Home Inventory Service Providers	Homeowners, renters, landlords	The Home Book for guests and house-sitters
carStuf	Vehicle Service Providers	Households with one car or several	Maintenance and expense logs per vehicle
sizeStuf	Sizes	Shoppers, gift-givers, DIYers	Eleven ready-made size templates
snapStuf	SnapStuf	Contractors, inspectors, movers	Rapid photo capture with spoken captions
medStuf	Medical Records Physicians Care Locations Medications People	Families and caregivers	A full health history per person
toolStuf	Tools People	Workshops, crews, generous neighbors	Check-out and loan history
choreStuf	Chores	Families with kids	Stars, streaks and a reward shop
budgetStuf	Budget	Households, couples, anyone with bills	A monthly plan per category with over / under

FOR BUSINESSES

Your business. Your data. Your way.

Every business keeps track of stuff: equipment, customers, job sites, inspections, inventory. When it doesn't fit off-the-shelf software, yourStuf is myStuf rebuilt around the way your business actually works, with your own collection types, your fields and your name on it.

A few collections a business might need

YOUR BUSINESS TRACKS	A YOURSTUF COLLECTION COULD INCLUDE
Equipment	Serial numbers, locations, condition, photos, service history
Customers	Contacts, locations, notes, documents, activity
Projects	Status, tasks, dates, people, costs, photos
Inspections	Checklists, results, dates, notes, signatures, photos
Service calls	Customer, technician, status, notes, parts, photos
Inventory	Item numbers, quantities, locations, values, photos
Anything unique to you	Fields and information designed around your workflow

Example: one piece of equipment

Rooftop HVAC unit #4	
Customer	Northside Medical Plaza
Location	Roof, east side
Model	RTU-480
Installed	Mar 2022
Warranty	Through Mar 2027
Last service	Aug 14
Next service	Feb 14 · reminder set
Assigned to	J. Alvarez
Photos · Documents · Service history	

Example record. Collections contain items, so each business gets exactly the fields it needs.

Your name, your logo

Your team sees your business's name and logo when they open the app, in place of myStuf's.

Only what your team needs

Your own collection types, plus whichever built-in myStuf types are useful. The rest stays out of the way.

Shared with the team

Someone in the field records it, and the office sees it the moment they need it.

New employees, same setup

Add someone and they get the same branding and collections automatically.

Turn your business's stuff into yourStuf. Tell us what you track today, where you keep it, and who needs it. We'll work out the collections and fields that fit, and send a quote. Contact mystufapp@gmail.com.

How a company might use it

Four examples. Each one starts from myStuf's engine (items, photos, documents, history, reminders, links) and adds the collection types and team setup that business needs.

HVAC and field service

Every unit at every customer site, with model, warranty, photos and full service history. A technician logs a visit from the roof, and the office sees it right away. Each tech gets their own "Service Calls" list, and reminders flag the next service before the customer has to call.

Property management

Each property with its units, appliances, keys and inspection reports. The Field Crew department can edit maintenance records, the Office can view them, and move-in and move-out inspections carry dated photos to settle deposit questions.

Churches, schools and nonprofits

AV and classroom equipment, the building's maintenance log, volunteer checklists, and items lent out and brought back, with who has what and the condition it came back in. Volunteers come and go; the records stay with the organization.

Clinics and small practices

Medical equipment with serial numbers, calibration dates and service contracts; supply inventory; and inspection checklists for each room. Due dates send real reminders, so a certification never lapses unnoticed.

Why yourStuf instead of myStuf for a team

	MYSTUF, OUT OF THE BOX	YOURSTUF
Name and look	myStuf	Your business's name, logo and colour on every screen
Collection types	33 built-in types, plus ones you design yourself	Types designed around your work and set up for you, alongside only the built-in types that help
Getting people in	Each person signs up, then you share collections one person at a time	Invite employees by email; departments like "Field Crew" or "Office"; share a collection with everyone or one department in one step
New hires	Share every collection with them again	New employees get the company's types and collections automatically
Each person's own records	Everyone keeps their own, separately	"Give everyone their own": one collection per employee, owned by the company, and all of them viewable as one list
When someone leaves	Their collections leave with them	The company keeps everything they worked on; their access ends
Storage	Per person, by plan	One shared company pool, with a per-employee breakdown and alerts to admins before it fills

One company plan, quoted for your team's size and storage. Company admins manage employees, departments and shared collections from myStuf Online; employees just use the app.

Start keeping track today.

Install myStuf or any lite app, start your free 21-day trial, and enter the things you'd hate to lose first. Everything links up as you go.

mystuf.app
